## Synopsis Books:

In this second volume of the Fantasy+: Best Artworks of CG Artists series, artists from around the world share their artwork and insight into the past, present, and future of digital art. In a world where art is quickly becoming industrialized and quick production is key, these artists distinguish themselves by their marked devotion to individual style and artistry. The artwork included speaks for itself, showcasing digital art's ability to accommodate a broad spectrum of style, from photorealism to the abstract and conceptual. Through interviews with both freelancers and industry insiders from Industrial Light and Magic, Disney, Imaginism, and Spicy Horse, the book explores the influence of traditional art in the digital era. Includes top artists hailing from all over the world such as Steven Stahlberg (Sweden), Mike Daarken Lim (US), Bobby Chiu (US), Kei Acedera (Canada), Marc Craste (UK) and more.
