## Synopsis Books:

Its the first book ever written for the everyday layperson that clearly, methodically and unemotionally makes the case for using violence as your ultimate survival tool. Controversial yet compelling, its being called the only book of its kind that takes you behind the scenes of true criminal violence and explains WHAT you must do to survive it. Not a book about techniques (there are none included) since focusing on how to stop violence is why many people dont survive it. This book instead flips everything, starting with the end result and working backwards. It looks at why criminals are successful without any training at all. And what you must do to counter that.
