Synopsis Books:

Talor Gardin may be a princess, but her life is no fairy tale. A year ago, her mother died and her father burned down their house. Now with a father in and out of a mental ward, shes working a minimum wage job to finish her last semester of college. To make matters worse, she gets itchy every time a guy makes a move on her. The itch could be anything, really: a desire to escape her haunted hometown, a financial windfall, the name of some vampire or all the above. Whatever the reason, she thinks the answers are written in the freckle constellations of her cute new coworker, Sage Talis.

Sage is the quiet, polite type with plenty of secrets like fangs and a price on his head and Talor cant figure out what makes him so irresistible until she hears him sing. But when cryptic letters appear on her wrist, Talor is thrust into a world where fantastic creatures lurk just below the skin, strangers keep calling her a princess, and everything she's been through is nothing compared to what's coming.
