Synopsis Books:

What if you were to find out that WWII didn't end quite the way we were taught, and that our government's UFO cover up was actually hiding something far more frightening than extraterrestrials?

A most scintillating and entrancing Cold War epic thriller. The best book about Nazi UFOs ever. It is so believable, it's frightening. The most Google-able book of facts you will ever read in a fiction. You will catch yourself wondering how anyone could have possibly missed something so obvious.

You may never look at the sky or the moon in quite the same way as you did before you read this book.

A thrill a minute, outlined with historical fact and laced with witty comical relief.
